the two volume set Inai 15875 15876 constitutes the proceedings of the 29th pacific asia conference on knowledge discovery and data mining pakdd 2025 special session held in sydney nsw australia during june 10 13 2025 the 68 full papers included in this set were carefully reviewed and selected from 696 submissions they were organized in topical sections as follows
survey track
machine learning
trustworthiness
learning on complex data
graph mining
machine learning applications
representation learning
scientific business data analysis and special track on large language models

robert kohler shows exactly how entrepreneurial academic scientists became intimate partners in science with the officers of the large foundations created by john d rockefeller and andrew

carnegie and in so doing tells a fascinating story of how the modern system of grant getting and grant giving evolved and how this funding process has changed the way laboratory scientists make their careers and do their work this book is a rich historical tapestry of people institutions and scientific ideas it will stand for a long time as a source of precise and detailed information about an important aspect of the scientific enterprise it also contains many valuable lessons for the coming years john ziman times higher education supplement

the new edition of science foundations provides comprehensive coverage of single and double award gcse science it is fully revised and updated to match the new gcse specifications for teaching from september 2001 it contains all the material required for the foundation and higher tiers with clear progression and explicit differentiation higher tier only material is clearly marked in separate spreads the language level is carefully controlled with illustrations and layout specifically designed to make the concepts accessible there are frequent opportunities for students to confirm their understanding of each key idea as it is introduced via short questions and summary passages on each spread the books include guidance for students on how to prepare for and answer their gcse examinations and a glossary of key words for ease of reference

surface chemistry is an essential and developing area of physical chemistry and one that has become increasingly interdisciplinary the second edition of surface science foundations of catalysis and nanoscience has been fully revised and updated to reflect all the latest developments in the field and now includes an extensive discussion about nanoparticle growth and the quantum confinement effects in nanoscale systems two new chapters have been added and discuss the liquid solid interface and non thermal reactions and photon and electron stimulated chemistry and atom manipulation there are now many more worked examples included throughout to help students develop their problem solving skills
